

FALL WORK FOR THE STOCK.

What Proportion Should Be kept and What Marketed.

CORN IS NOT OUT OF DANGER.

Some Sections Injured by Bad Growing Weather—Plum Raising in Nebraska—Daily Cattle Diseases—Farm Notes.

Fall Work for Stock.

With cattle and hogs at this time one of the most important items to determine is how many it will be best to keep and what shall be marketed, says the American Agriculturist.

With the run of a good pasture and a very little extra feeding stock ought to be in a good condition, so much so that a few weeks of heavy feeding on grain will fit them for market. If there is plenty of feed the better plan is to fatten on the farm before marketing.

But it is only in exceptional cases that the farmer can make it profitable to purchase feed to give to fattening stock and if the supply of feed is not sufficient to feed all the stock that are sufficiently fattened, and at the same time keep in good condition, it is considered best to winter a good, thrifty condition, the better plan will be to sell while they are in a good condition ready to fatten.

It is often the case that at this time good stock that are in a good condition can be sold to a better advantage now than later unless they can be fattened. With hogs all that are fattened should be marketed, and does not pay to winter any more hogs than can be helped and the necessary breeding stock with the young pigs all that should be wintered.

Another item that should be looked after now is sheep. This should be prepared in winter so that they will not be until it is actually needed. This is one item of farm work that should always be done in advance. The principal items are convenience, warmth and dryness. The place selected should be where good drainage can be given, and then with a tight roof the stock can be kept dry. In the pig pens provide a good tight floor to feed grain upon, and a good trough for water and slops. The cattle should have a good tight manger for feeding hay and fodder, and tight boxes for bran and grain.

On the majority of farms it will pay to have a feed mill for grinding the grain and a cutting box for cutting the roughness. The feed meal, as well as the different combinations that it is possible to make, will make the investment profitable.

There is always an item to secure the best gain at the lowest possible cost, and this can be done by grading and cutting the feed and combining so as to make up complete rations. Lay in a supply of bedding not only to increase the comfort of the cows, but also to increase the quantity of manure. It is something difficult to secure dry bedding during the winter, unless it is secured in the fall and stored away. A sufficient quantity should always be used to keep the cows clean, and to absorb all the liquid voiding.

If more breeding stock is needed, and especially with the hogs, now is a good time to secure it, some time in advance of when it will be needed. The crop will have time to recover from the effects of shipping and the change in their management.

Corn Not Out of Danger.

There has been a good deal of solicitude among the business men, millers, bankers, etc., for two weeks concerning the corn crop. The general feeling was that it was in serious danger from frost. The hot dry weather of the last half of August, and the continued dry and the cry now is that there is a great danger of drought. There is some ground for this alarm, says the Iowa Homestead. While the weather has been just right for corn in all parts of the country where the crop is raised, the weather and there were timely showers in July, it has not been right for sections having a wet June. Hence the entire country from southern Kansas through to Ohio has been called upon to stand a very severe test, and we have no doubt that the crop is cut short. The reports from the various counties in southern Iowa, from Marion to Lee, as given to the signal service station at Des Moines, Forest Garden and Miner, are suffering, and travelers tell us that much of it is "firing." This indicates danger that cannot be repaired. The country in Iowa north of the Illinois Central is likewise suffering, except the counties of the divide. Eastern Iowa is suffering worse than in the west. In central western Iowa the corn is all that could be desired. The officer in charge of the Iowa service sums up the situation as follows: "The crop is early planted and well tilled, corn rapidly maturing and doing well. Some fields are already out of danger of damage by frosts, and the bulk of the crop will be matured by September 15. The dry weather has undoubtedly reduced the total yield of corn 15 per cent below the estimate made at the first of the month, but the crop will be ample."

A Mule Has a Colt.

At the Bear creek ranch of County Commissioner Dyer a mare mule that has been about the place (foaled a colt, says the Cheyenne Leader. The progeny is now about a week old, seems healthy and will doubtless live. It is a pinto in color and has the outward physical characteristics of the mule. The mother is very proud and cares for the colt properly. A Norman stallion in Wyoming of a mule foaling and has attracted the attention of the ranchmen in the Bear creek country.

A gentleman who knows about all worth knowing on the subject of horse breeding says that one other mare mule has foaled since the world began. This animal was born in the year 1840, and has since and has twice become a mother. Her colts are driven to a phaeton.

Mr. Dyer says he will bring the strange animal to town for the fair, but he the news of its birth was telegraphed to the city, and he will be sure to receive an offer for the animal before that time.

Farm Notes.

Do not feed corn to the pigs yet. Give it to the hogs to pick over. This is the season for hatching the bantam chicks if you wish them to be as small as possible. In driving horses on the road let them drink at every opportunity; a dozen times a day is not too often. Clover hay can be used to advantage as summer feed for the pigs. Hay should not be sold but fed on the farm. Dahlias fall to the ground if the growth is rank. To grow them properly they should be planted in clusters with a wire on the outside. The King of the East made 1,000 barrels of vinegar from twenty acres of watermelons and sold the vinegar for \$10 a barrel has founded a new and valuable industry. He has also shown that the best way to avoid cramps from watermelons is to convert the melons into vinegar.

THE SPECULATIVE MARKETS.

The Popular Feeling in the Northwest Far From Bearish.

AN EXTRAORDINARY STATEMENT

How the Jump is Explained—Fluctuations in Corn and Oats—Shippers Taking Hold Freely—Oats Tending to Weakness.

CHICAGO PRODUCE MARKETS.

Chicago, Sept. 21.—(Special Telegram to The Bee.)—Wheat was dull and steady at some recovery from yesterday's closing price. Several times during the day the market acted as though it might "dip" on small speculation, but the superior power was too strong and the expectations of lower prices ended in a disappointment. Cables were generally steady, but in European and British markets Saturday is an off day and little business for foreign account was done in any of the American markets.

The sale of 100,000 bushels for export was reported from Duluth, however, and lake engagements were reported here for 140,000 bushels. Atlantic port clearances for the week came at 48,000 bushels of wheat and 190,000 packages of flour. The export movement is not what it should be, though high ocean freights may explain why the property does not go out as readily as could be desired. In the west the increase in the quantity of both spring and winter wheat is foreboding. Farmers are at least, it has called our attention to it in a way that we have never had it called to us before, so that we have now begun to make a study of fodder corn.

It costs less to raise a colt than to be supposed. The colt requires attention, however, as it must be carried and properly stabled, but with plenty of pasture but little other food is required, except an allowance of grain daily. If well-bred the colt should bring a good price when three years old. The silo has brought new revelations to us and given us a value in fodder corn that we have never had before; at least, it has called our attention to it in a way that we have never had it called to us before, so that we have now begun to make a study of fodder corn.

A Florida paper tells of a snake-bitten horse was cured: "About two weeks ago J. W. Gerald's mare was bitten by a snake in his grove, on Lake Harris, supposed to have been a moccasin. The mare had spasms, and the first night after being bitten charged all over the grove on a dead run. She then swelled until her hide was as tight as a drum head. Mr. Gerald tried three remedies and cured her, a strong, but very little bled, tobacco tea, and with a tea made from the moss which grows on the north side of forest trees. The mare was sick twelve days."

Something to Remember.

If you are going east remember the "Rock Island Route" run the sleepers and chair cars of their solid vestibule train to and from the Omaha depot, leaving Omaha at 8:45 p. m. This regular transfer at Council Bluffs. Three solid trains daily. All chair cars are free. Dining cars on all through trains. Our trains make close connection with all eastern limited trains connecting in union depot at Chicago, avoiding a transfer across the city to parties enroute to New York, Boston and other eastern cities, and everything a little better than other lines offer. Ticket office 1305 Farnam. Gen'l W. A. Ladd, on Niagara street, two of the leading mediums of the country, Mr. and Mrs. Cobb, have spent some time being stopping as guests, having been invited there directly after the close of the four days' meeting at Carsadage lake. Mrs. Ladd is not a spiritualist, but she was greatly attracted by the novelty of their manifestations—notably by a lace-making spirit generated by Mrs. Cobb, which carried all hearts by storm. Numerous affidavits were given, either seen or heard of this spirit, which is believed to rest near yesterday's closing figures, but this was of short duration. The long look advantage of the market to sell out, and shortly also supplied buyers with more than they could take. A firmer feeling in wheat towards the close gave the market some sympathy. The list closed at a recovery of about 1/4c from the bottom figures, September about at 32c and October at 31c.

PHOTOGRAPHED THE SPIRIT.

A Bogue Spook Cleverly Exposed by an Artist at Buffalo. Spiritualism in Buffalo has received a black eye from which it will hardly recover. At the house of Mrs. L. A. Ladd, on Niagara street, two of the leading mediums of the country, Mr. and Mrs. Cobb, have spent some time being stopping as guests, having been invited there directly after the close of the four days' meeting at Carsadage lake. Mrs. Ladd is not a spiritualist, but she was greatly attracted by the novelty of their manifestations—notably by a lace-making spirit generated by Mrs. Cobb, which carried all hearts by storm. Numerous affidavits were given, either seen or heard of this spirit, which is believed to rest near yesterday's closing figures, but this was of short duration. The long look advantage of the market to sell out, and shortly also supplied buyers with more than they could take. A firmer feeling in wheat towards the close gave the market some sympathy. The list closed at a recovery of about 1/4c from the bottom figures, September about at 32c and October at 31c.

The Natural Condition of men and animals is health; the abnormal condition is disease.

There is always an item to secure the best gain at the lowest possible cost, and this can be done by grading and cutting the feed and combining so as to make up complete rations. Lay in a supply of bedding not only to increase the comfort of the cows, but also to increase the quantity of manure. It is something difficult to secure dry bedding during the winter, unless it is secured in the fall and stored away. A sufficient quantity should always be used to keep the cows clean, and to absorb all the liquid voiding. If more breeding stock is needed, and especially with the hogs, now is a good time to secure it, some time in advance of when it will be needed. THE SPARTAN VIRTUE OF FORTITUDE

must be possessed in no ordinary degree by those who bear the heaviest burdens of life without complaint. We have never heard of a life-long martyrdom begins, extinguish the term of this atrocious disease. The efficacy of which as a preventive of the disease, as well as a means of relieving it. It is a simple matter, during the last five years, over professional signatures! It expurgates from the blood those acrid principles which beset the patient, and is characteristic of this complaint, which it should be recollected, is always liable to terminate in life, unless a radical cure is effected. The Bitters also expels the malarial from the system, remedies dyspepsia, kidney complaint, constipation and biliousness, and restores the nervous system to its whole physical organism.

Fires On the Pacific Coast.

The Portland Oregonian says that the Pacific coast has suffered greater losses from fire during 1889 than any other section of the United States. It is computed that \$50,000,000 worth of property has been destroyed by fire since the beginning of this year. Of this sum California and Washington contributed a little over half.

AS GOOD AS GOLD.

Desiring to attract universal attention, we have adopted this novel and expensive method of placing our property before the people. The lots we are giving away in Plainfield, a new suburban addition on the Fort Worth & Denver railroad, only a few minutes ride from the Union depot at Denver, Colo.

These lots are 25x125 feet, wide streets and nice park reserved. We keep every other lot for the present and will not sell. Every lot that is given away will be worth \$100 in 1891. In 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 1912, 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000.

THE RAILWAY TIME TABLES.

OMAHA.

Table with columns for destination (Burlington, Chicago, St. Paul, etc.), departure time, and arrival time.

CHICAGO LIVE STOCK.

Chicago, Sept. 21.—(Special Telegram to The Bee.)—Cattle—Arrived in two days' arrivals were 15,000 natives, mostly common, and 3,600 Texans. The market ruled slow, buyers evidently having filled their orders for the week before the finish of yesterday's market. About the only trading in shipping steers to-day were the odds and ends to fill out shipments, and no material change in values was noted. Dressed beef men claimed they would rather wait till Monday in preference to dealing in "trash," as they termed it, on sale. City butchers bought choice cows and heifers at steady prices, but neglected the common grades. Texans sold draggingly at weak prices. A large number of sheep and feeding cattle were to be carried over at the low prices prevailing. Choice to extra heaves, \$4.30 to \$4.70; medium to good steers, \$3.50 to \$3.90; \$2.40 to \$2.80; 1200 to 1350 lbs. \$3.00 to \$3.20; 1000 to 1200 lbs. \$2.50 to \$2.75; stockers and feeders, \$1.85 to \$2.10; cows, \$1.50 to \$1.75; western ranges, \$2.35 to \$2.75; cows, \$2.40; wintered Texas, \$2.50 to \$3.00.

FINANCIAL.

New York, Sept. 21.—(Special Telegram to The Bee.)—Stocks—The stock market this morning labored under the weight of the poor closings of yesterday's London exchange and the uncertainty regarding the weekly bank statement. Trusts were a special cause of weakness on Friday, and the action of the close last night. The principal loss was 7/8 in the sugar trust while Rock Island was an exception, opening 1/4 higher. Northern Pacific preferred alone among the usually active stocks showed any special animation. The sugar trust did a fair business but the rest of the market was dull and stagnant. Sugar, however, quickly rallied and regained the loss, while the general list advanced a small fraction, generally wiping out losses of the opening. Coal stocks were the only special feature, however, Jersey Central continuing its upward movement, reaching 12 1/2, a gain of 1/4 per cent on its opening figure. During the hour to 12 o'clock the bank statement was made public, showing a decrease of \$3,000,000 in the reserves. This was not so bad as the croakers predicted. The hour brought a better strength to the stock list. Louisville moved up 1/4, closing 3/4 higher. Manitoba gained a full point to 111. Northern Pacific closed 3/4 over the close last night. The granger's group closed 1/2 per cent higher all around with Rock Island up 1/2 per cent to 103 1/2. The total sales were 75,000 shares for the day.
